

## KS2 5C Pa Pa Paa! Quiz

### Planning/adapting

This lesson involves a rapid, fun quiz game.

### Delivery alternatives:

Run the lesson as a **solo quiz**, without teams: give the class 10-15 minutes to answer all questions before swapping sheets to mark them.

Use *Interactive 5C – Pa Pa Paa! quiz* instead of or as well as the written quiz (it has different questions).

### Print/copy:

- *Printout 5C1 – Pa Pa Paa! quiz board and cards* (one per team) and cut up
- *Printout 5C2 – Quiz questions* (one per team or just one for teacher)
- *Printout 5C3 – Quiz answers* (one for teacher)

### Starter (5 mins)

Tell students that this lesson is revision; designed to test their knowledge and understanding of everything they have learned about cocoa farmers, chocolate production and Fairtrade.

Give out one chocolate bar-shaped board and one set of small cards from *Printout 5C1 – Pa Pa Paa! quiz board and cards* per team of three or four students. Students should place their cards blank side up. Invite students to give their team a chocolatey name.

### Main activity (25 mins)

Call out questions (or hand out *Printout 5C2 – Quiz questions* to each team). Students confer and write down their choice of answer.

Read out the correct answer after each question. If a team is correct, one person in the team turns over a card and places it on the board where they think it is in the chocolate journey. Students can move cards later as others turn up.

When their board is full, the team all shout 'Pa Pa Paa!'. Before announcing the winner, check from their written record that the winning team's list of answers is correct, and that they have the order correct. Dole out prizes all round.
